About these screens

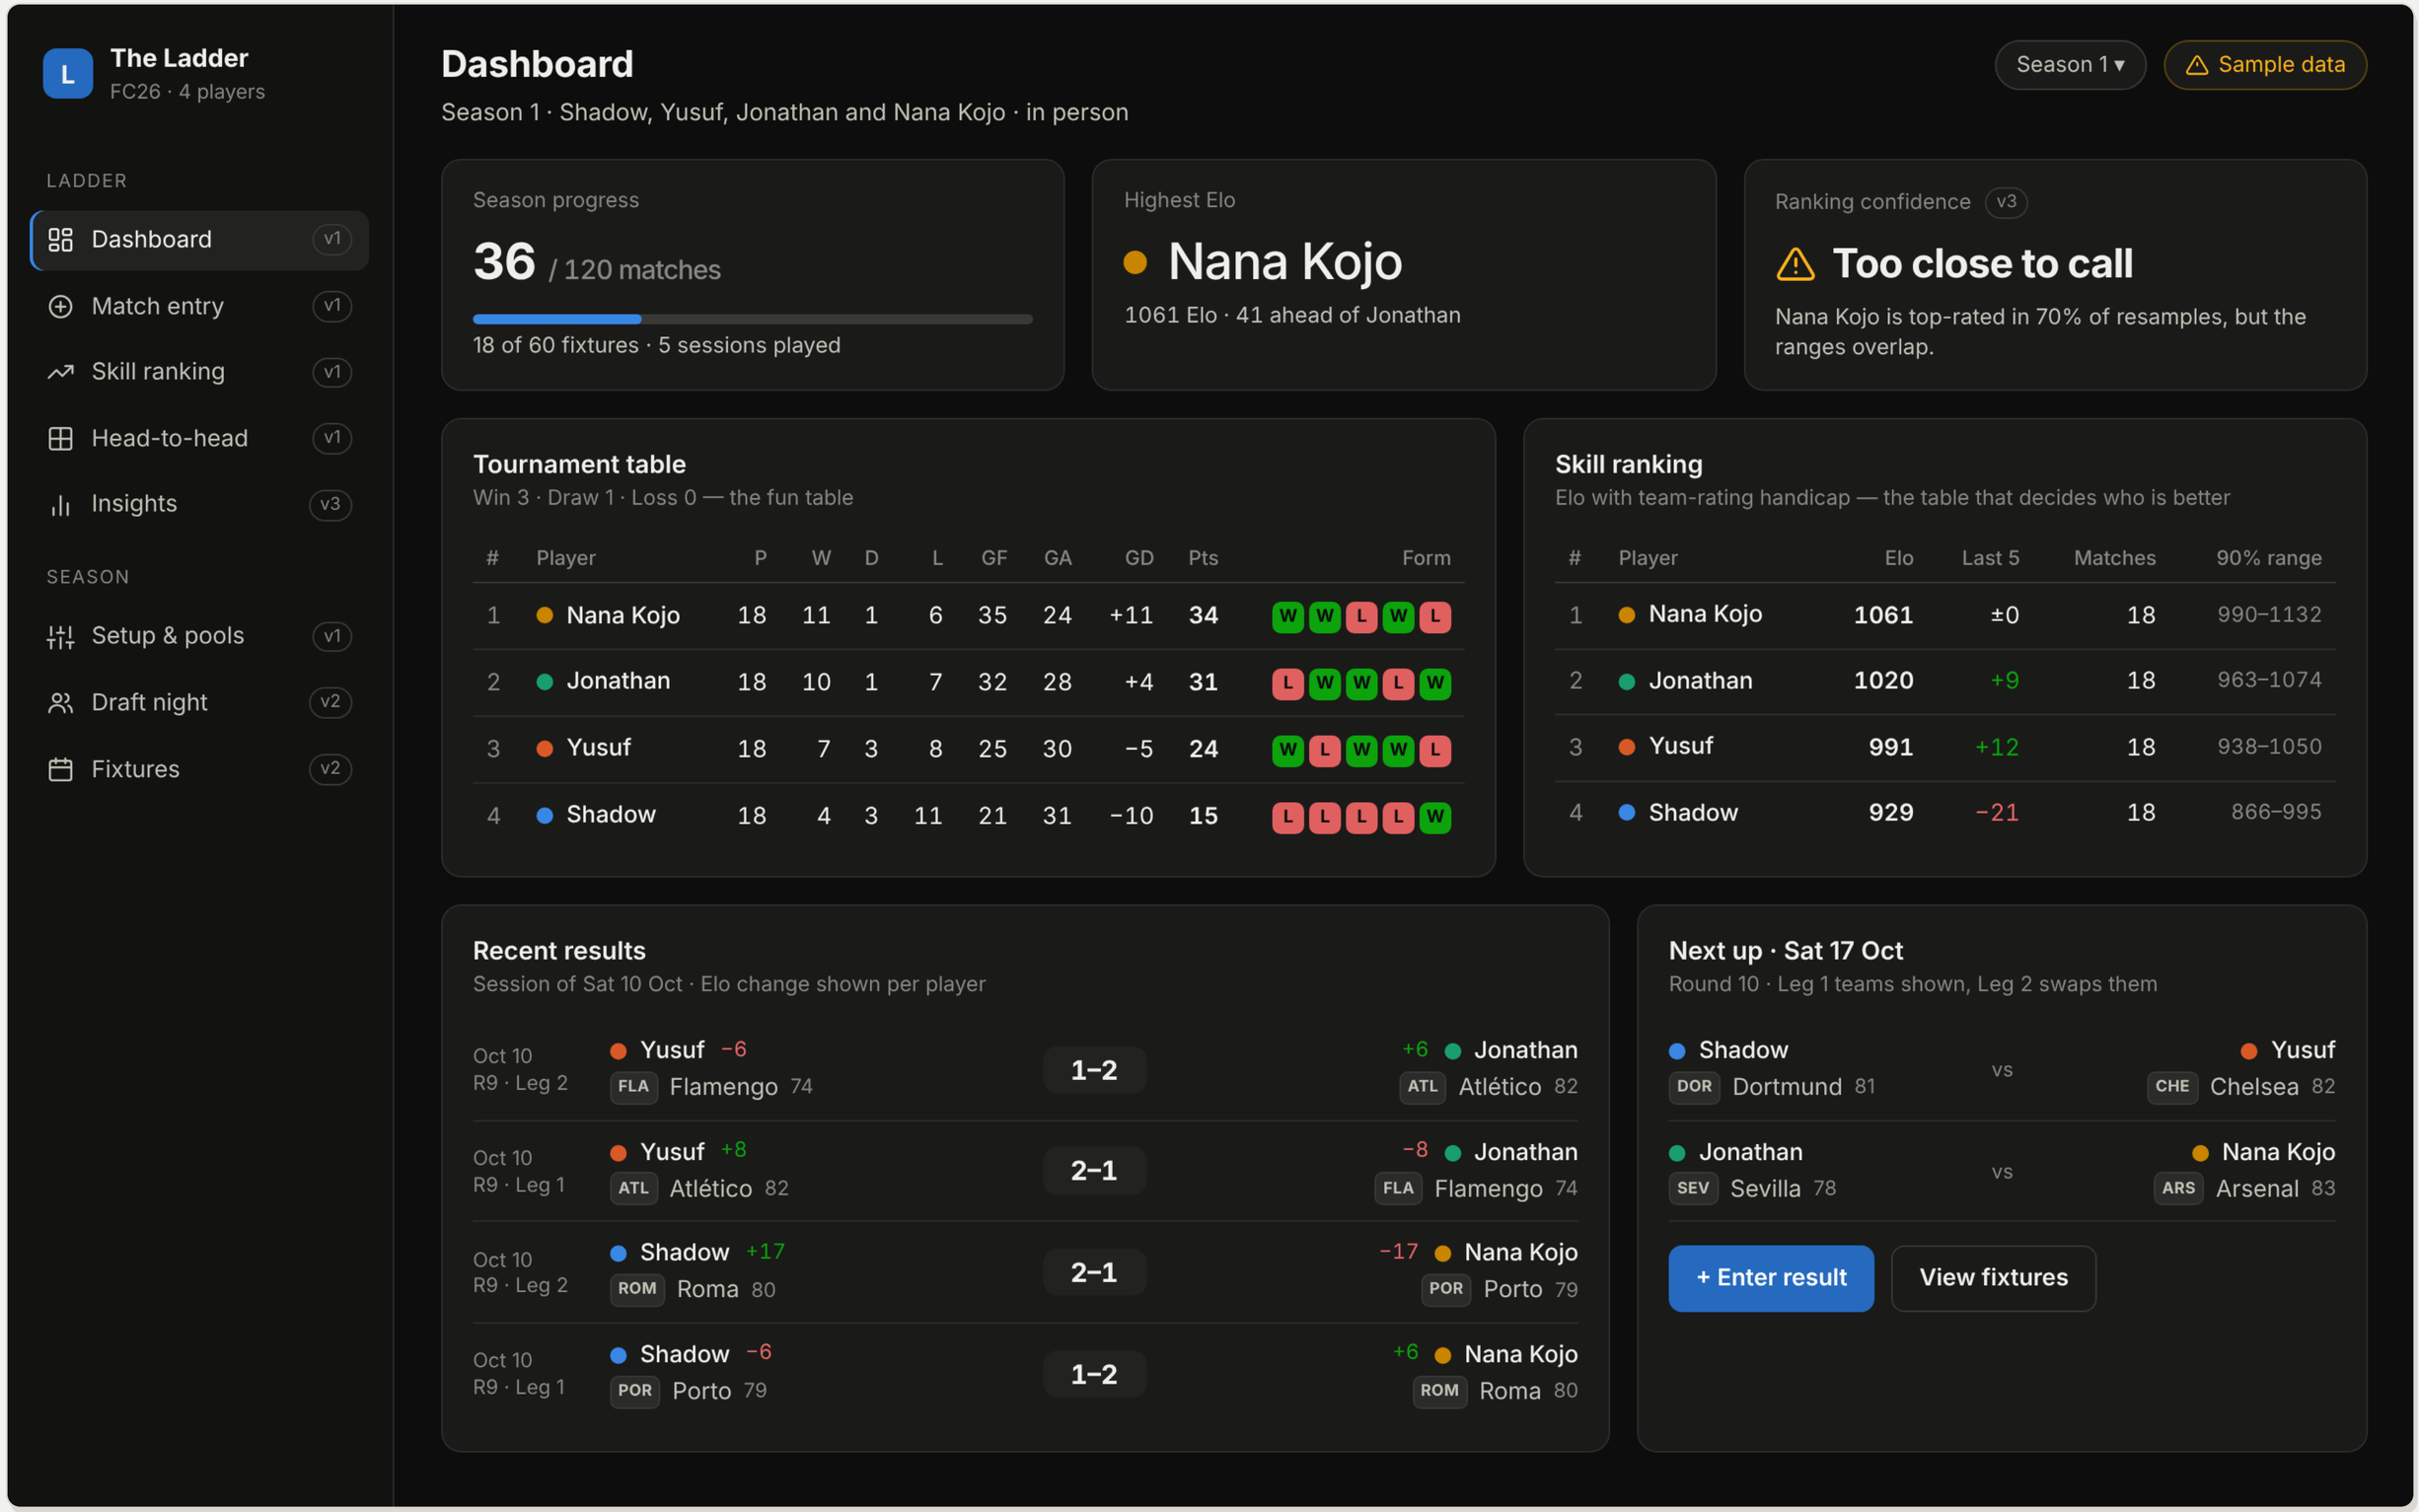

These are mockups of the web app described in fc26-ranking-system.md.

All match results are invented sample data.
Team ratings are illustrative, not the real FC26 release values.
The Elo numbers are real outputs of the formulas in the document, run over a simulated season of 36 matches (K = 24, 20 Elo per team-rating point, goal-margin cap 1.75).

Version tags show which scope phase each screen belongs to:
v1 = MVP, v2 = draft tool and scheduler, v3 = charts and confidence.

01 **Dashboard** v1 MVP

Both tables side by side, season progress, recent results and what is next.

02

Match input specification

v1 MVP

Section 5 of fc26-ranking-system.md: what is entered after each match, what the app works out, and the save checks.

5.1 Inputs entered by the players

One form per leg, straight after the final whistle. Target: under 20 seconds. Numbers match the badges on the match-entry screen.

#	Field	Type	Required	Notes
1	**Fixture**	Pick from list	Yes	Pre-fills date, round, leg, players and teams. “Unscheduled match” only for friendlies outside the fixture list.
2	**Player A**	Locked from fixture	Yes	The player listed first in the fixture.
3	**Player B**	Locked from fixture	Yes	The other player.
4	**Player A’s team**	Pick from A’s pool	Yes	Pre-filled by the scheduler; can only change to another team in A’s locked pool.
5	**Player B’s team**	Pick from B’s pool	Yes	Same as above. In Leg 2 the two teams are swapped automatically.
6	**Player A goals**	Whole number, 0+	Yes	Score at the end of normal time (90 minutes).
7	**Player B goals**	Whole number, 0+	Yes	Same.
8	**Extra time / penalties**	Yes / No	Yes (No)	If Yes, the result counts as a draw in both tables, whatever happened in extra time.
9	**Shoot-out winner**	A / B	If 8 = Yes	For fun and stats; does not change Elo or points.
10	**Rage quit / abandoned**	Yes / No	Yes (No)	If Yes, the match is recorded as a loss for the player who quit.
11	**Player who quit**	A / B	If 10 = Yes	Recorded as a 3–0 loss for the quitter, unless they were already losing by more.
12	**Notes**	Free text	No	e.g. “controller swap at half-time”.
13	**Confirmed by opponent**	Tap to confirm	Yes	The other player confirms the score before it saves. Prevents disputes.

Optional stats (v3, off by default): shots, shots on target and possession for each player, copied from the end-of-match screen. Used to spot lucky wins; never used in Elo.

5.2 Calculated by the app

Never typed in

Date, session, round, leg	From the fixture
Team ratings	Locked release-day ratings
Result for each player	Win / draw / loss from the score, or forced draw / loss from fields 8 and 10
Table points	Win 3 · draw 1 · loss 0
Expected score	Section 6, Step 2
Goal-margin multiplier	Section 6, Step 4
Elo before, after, change	Section 6, Step 5
Team usage count	+1 use per team; warns at the season cap
Form, streaks, clean sheets	Updated from the match log

Before saving, the form shows a rating impact preview so both players see the effect before confirming.

5.3 Checks before saving

- Players are different, and each team is in the right player’s pool.
- A team cannot be used beyond its season cap (default 3).
- Leg 2 must use the Leg 1 teams swapped; anything else is blocked.
- Goals are whole numbers from 0 to 20.
- If extra time / penalties is Yes, the normal-time score must be level.
- The same fixture leg cannot be saved twice.
- Saved results are append-only. A correction is a new entry that reverses the old one, approved by all four players.

5.4 Example entry

With Shadow on 929 Elo and Yusuf on 991 (sample data)

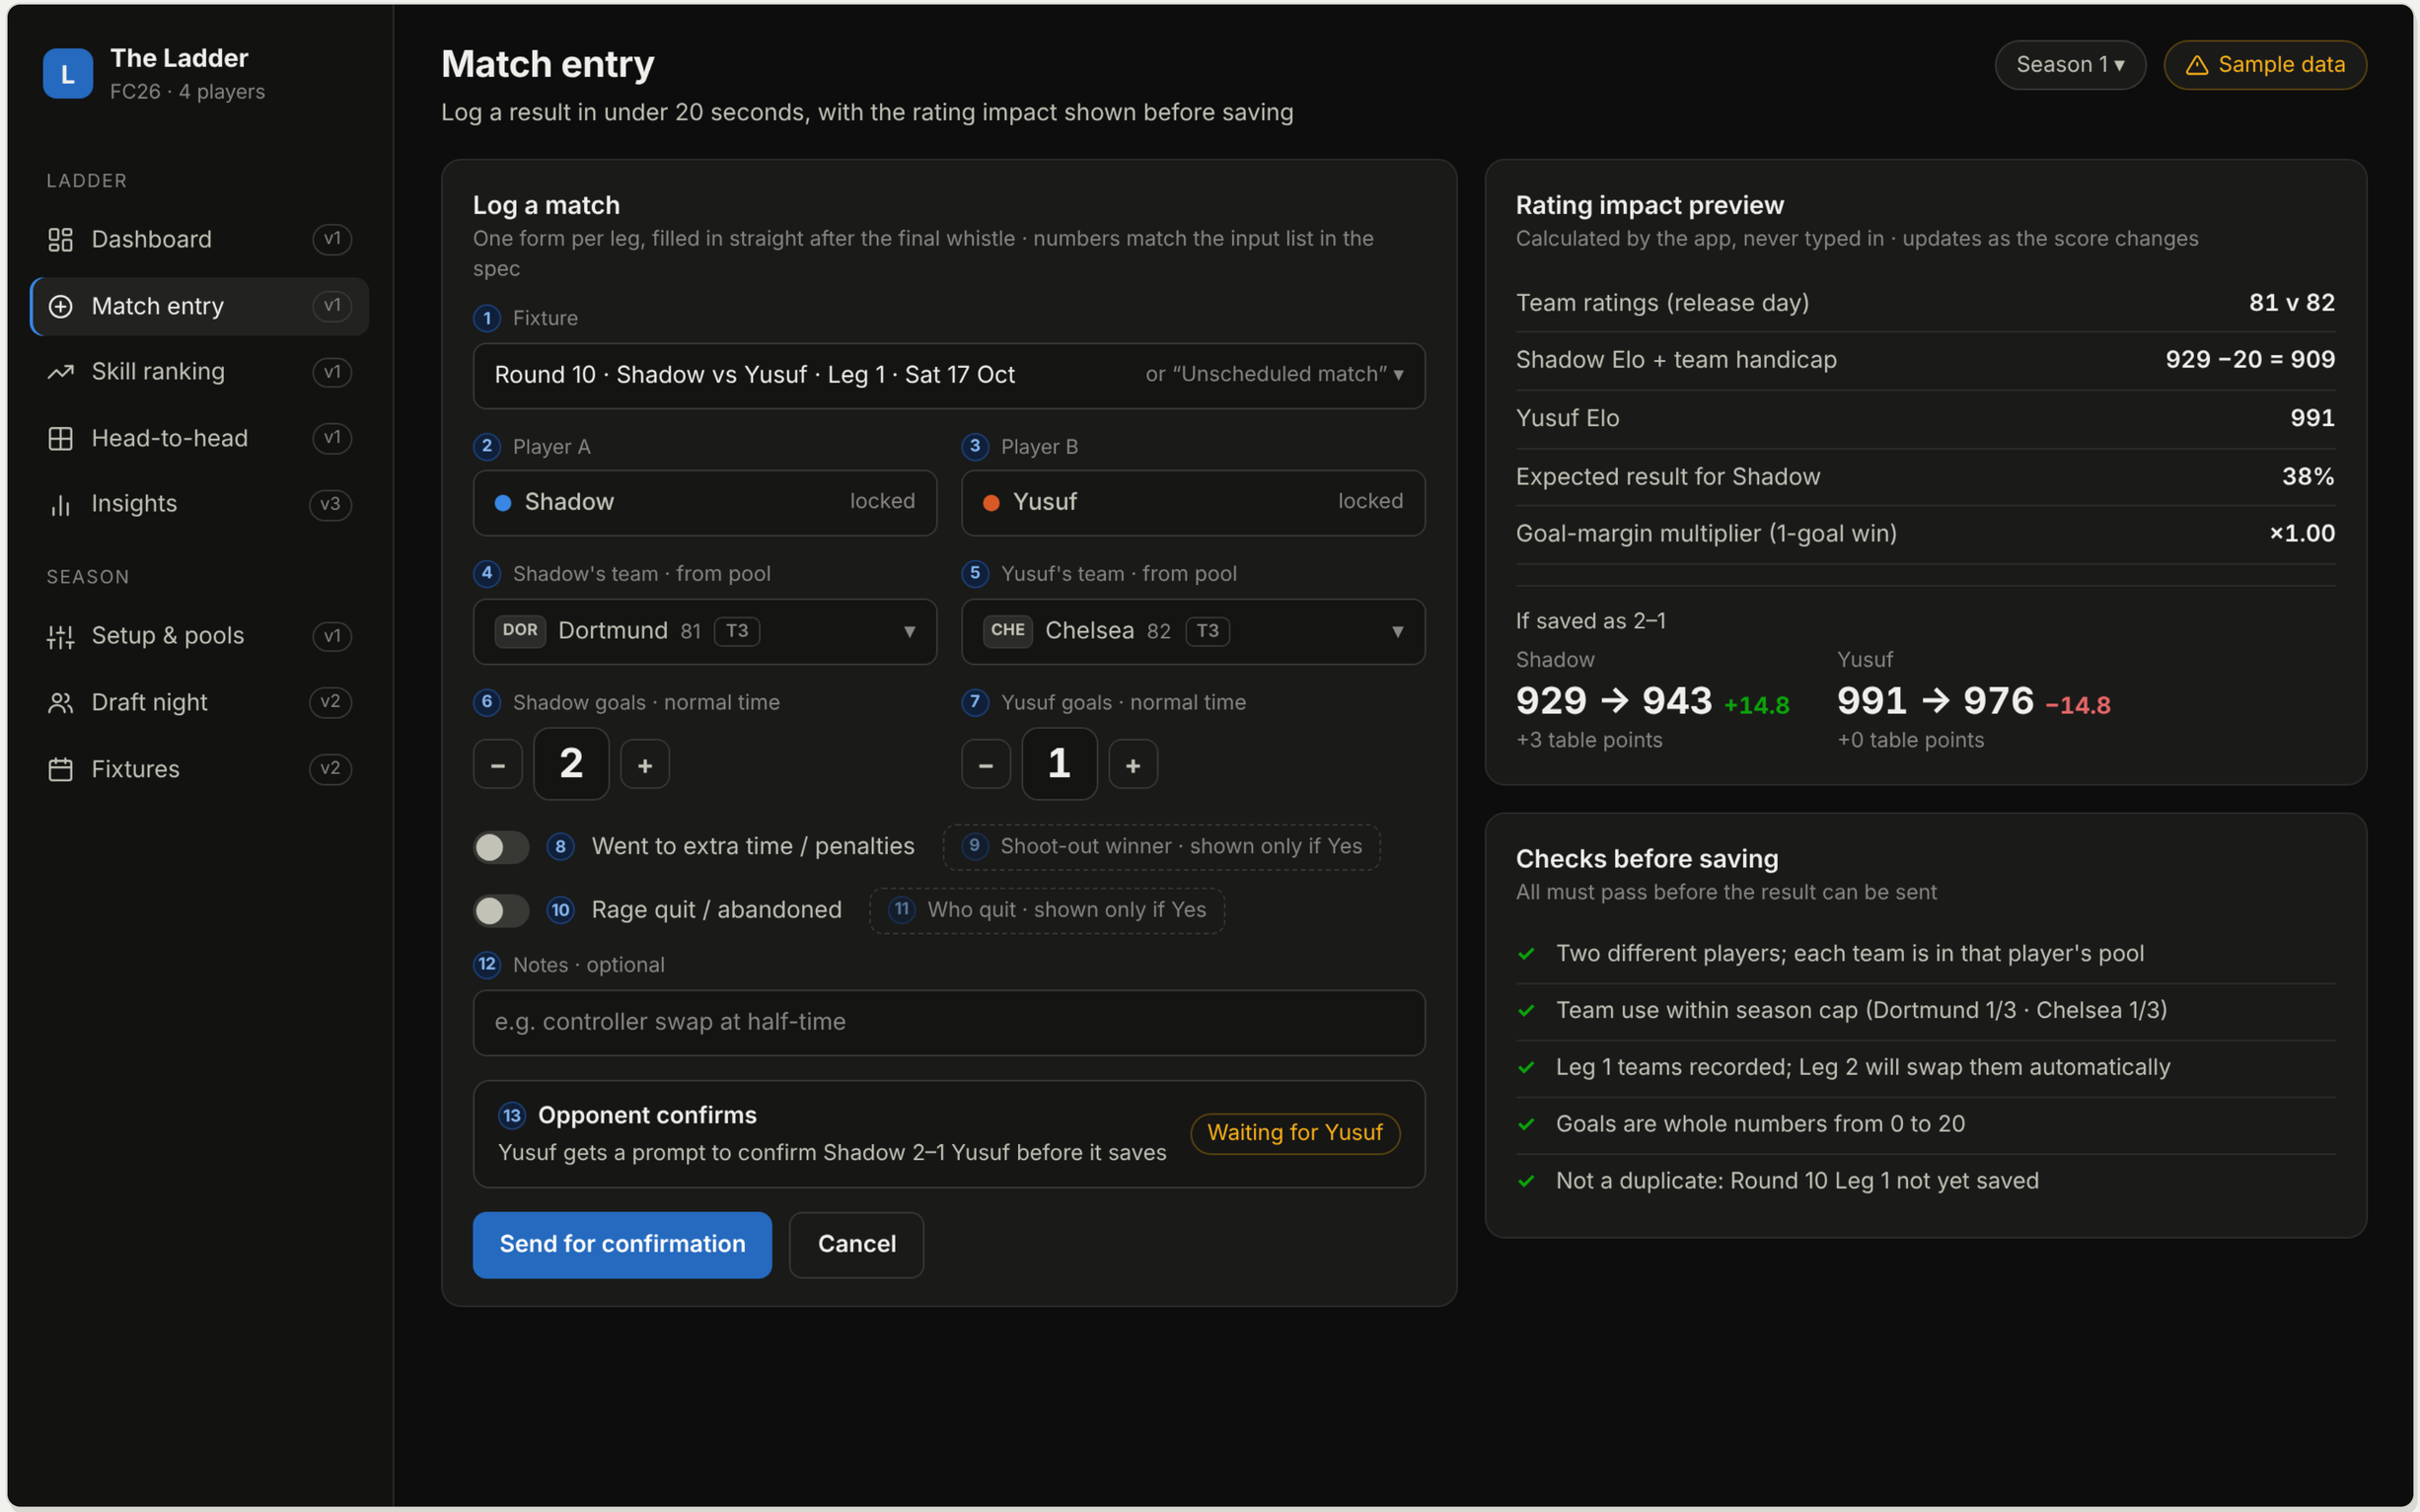

Fixture	**Round 10, Leg 1, Sat 17 Oct: Shadow v Yusuf**
Shadow’s team	**Borussia Dortmund (81)**
Yusuf’s team	**Chelsea (82)**
Score (normal time)	**Shadow 2, Yusuf 1**
Extra time / penalties	**No**
Rage quit	**No**
Confirmed by	**Yusuf**

What the app then works out

- Team gap for Shadow: 81 − 82 = -1, so handicap = -20 Elo; Adj_Shadow = 909
- D = 909 − 991 = -82, so E_Shadow ≈ 0.38
- 1-goal win, so G = 1.0
- Shadow: 929 + 24 × 1.0 × (1 − 0.38) ≈ **943.8** (+14.8)
- Yusuf: 991 − 14.8 ≈ **976.2** (-14.8)
- Table: Shadow +3 points, Yusuf 0

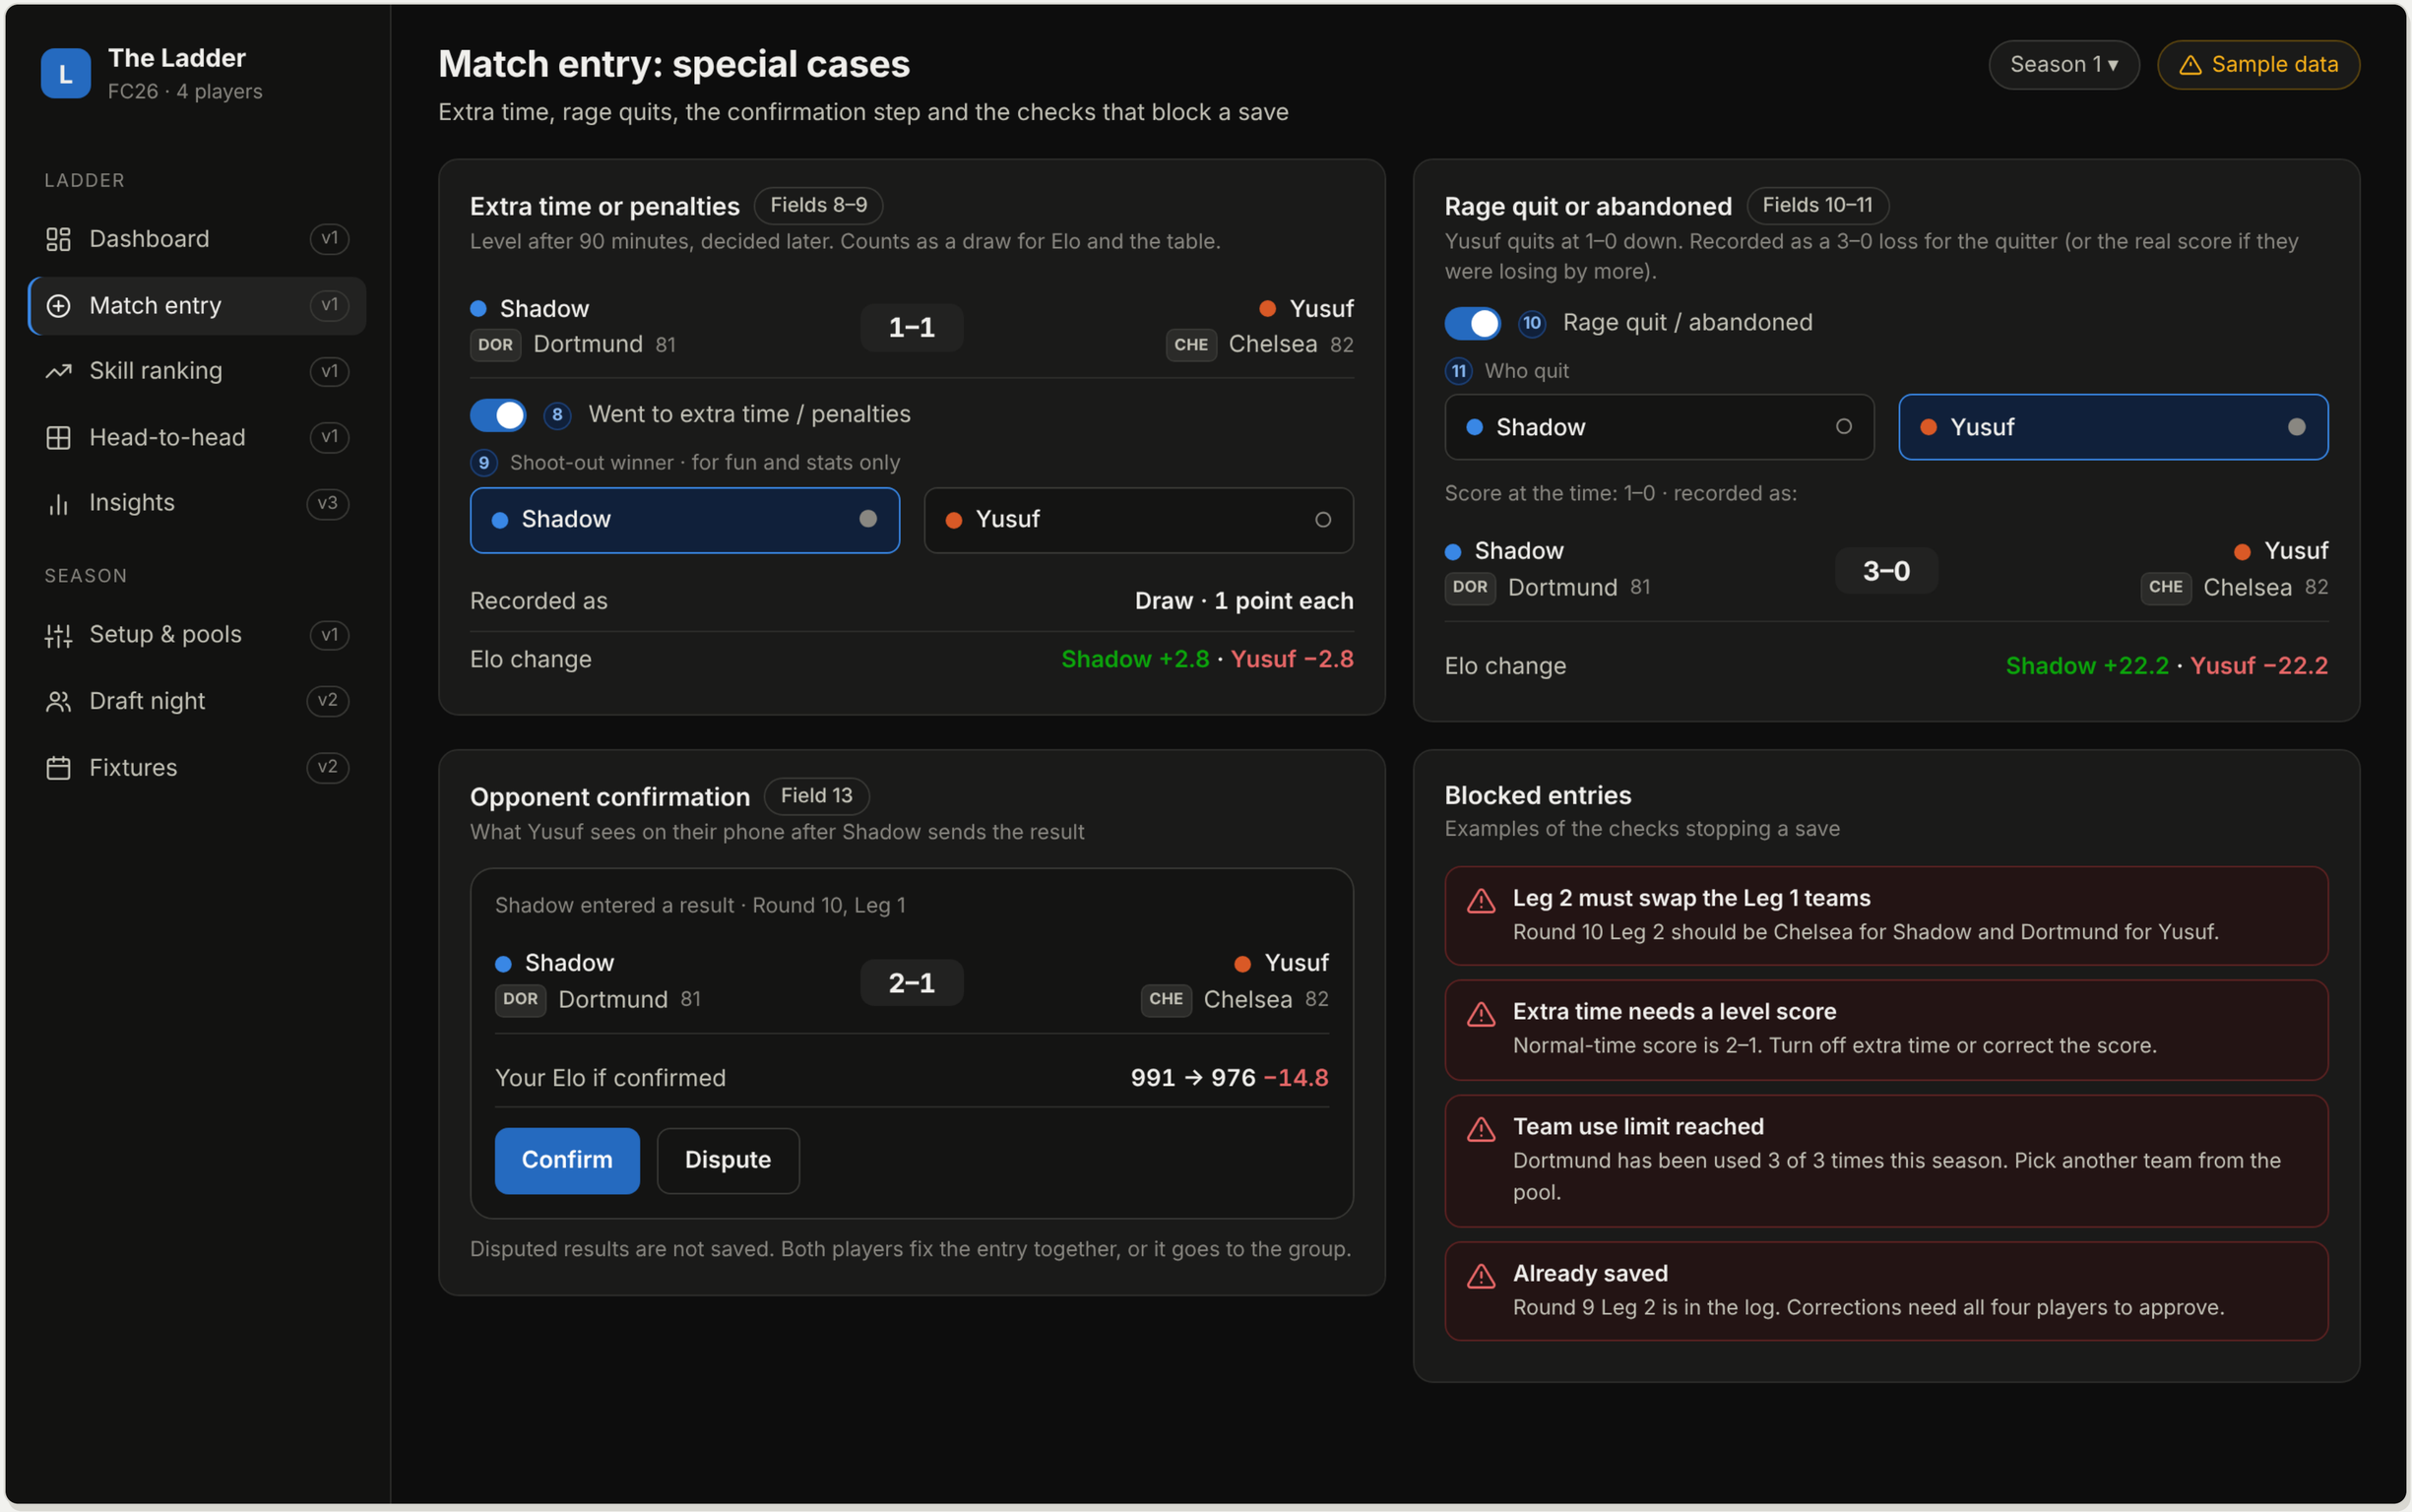

03 **Match entry** v1 MVP

All 13 inputs from spec Section 5.1, numbered. Elo impact and save checks shown before sending.

04 **Match entry: special cases** v1 MVP

Extra time and penalties, rage quits, opponent confirmation, and the checks that block a save.

05 **Skill ranking** v1 table · v3 chart and ranges

The leaderboard that decides who is better, with an honest “too close to call” label.

Skill ranking

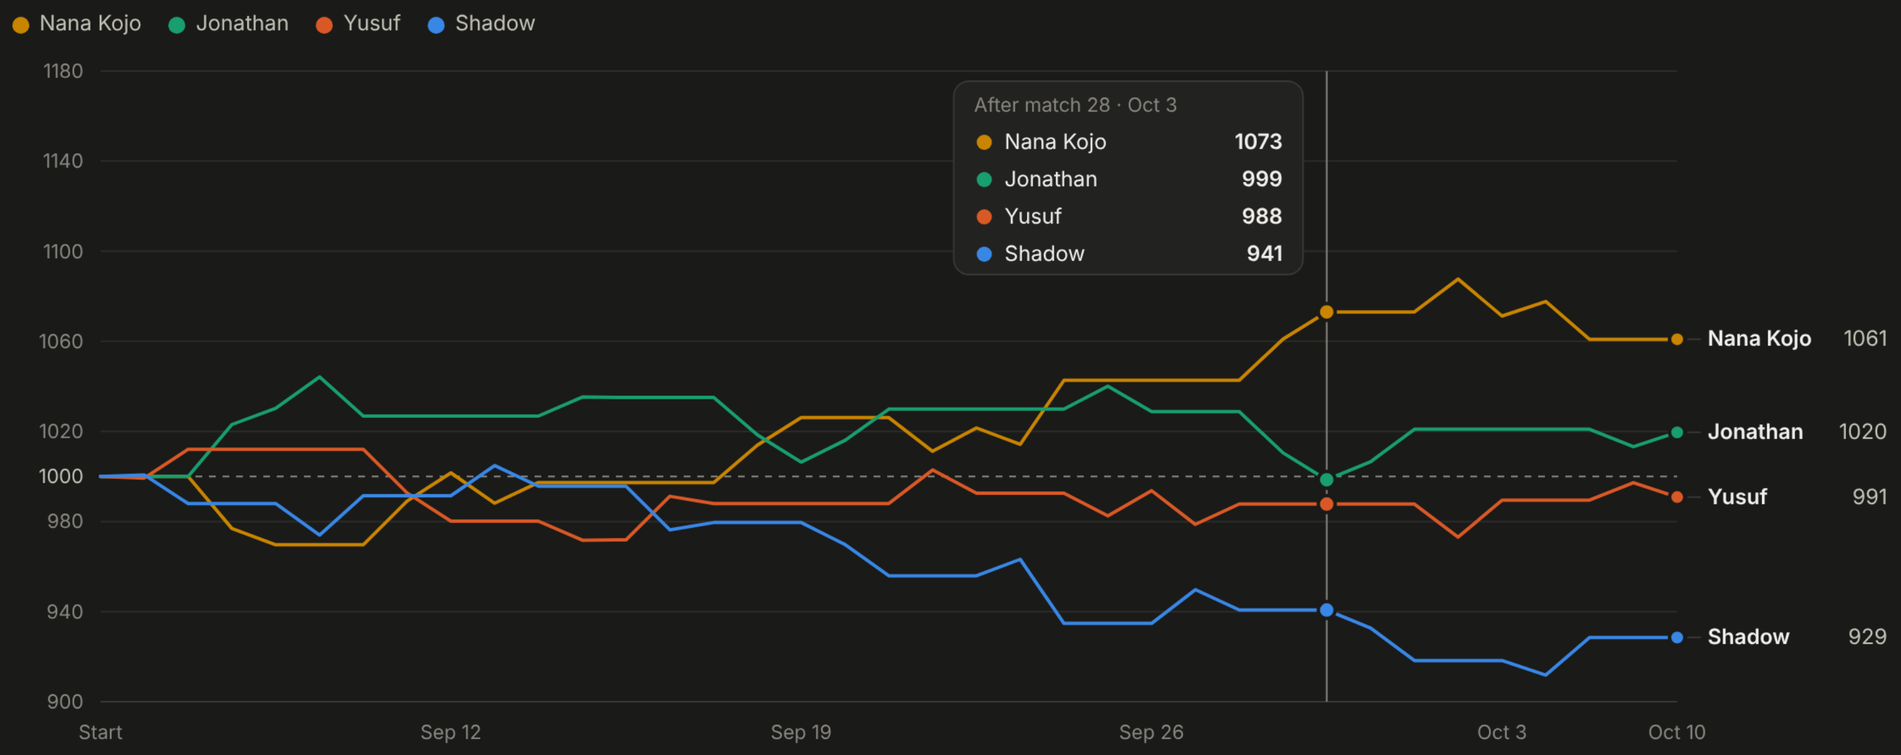

The real leaderboard: pure skill, adjusted for the strength of the teams used

Season 1 ▾ | ⚠ Sample data

⚠ **Too close to call. Nana Kojo is ahead on Elo, but with 18 matches each the top players cannot be separated yet.**
The 90% range comes from resampling the match log 600 times. A leader is only named when their lowest plausible rating beats everyone else's highest.

Elo over the season v3

Every match moves two ratings; the dashed line is where everyone started (1000)

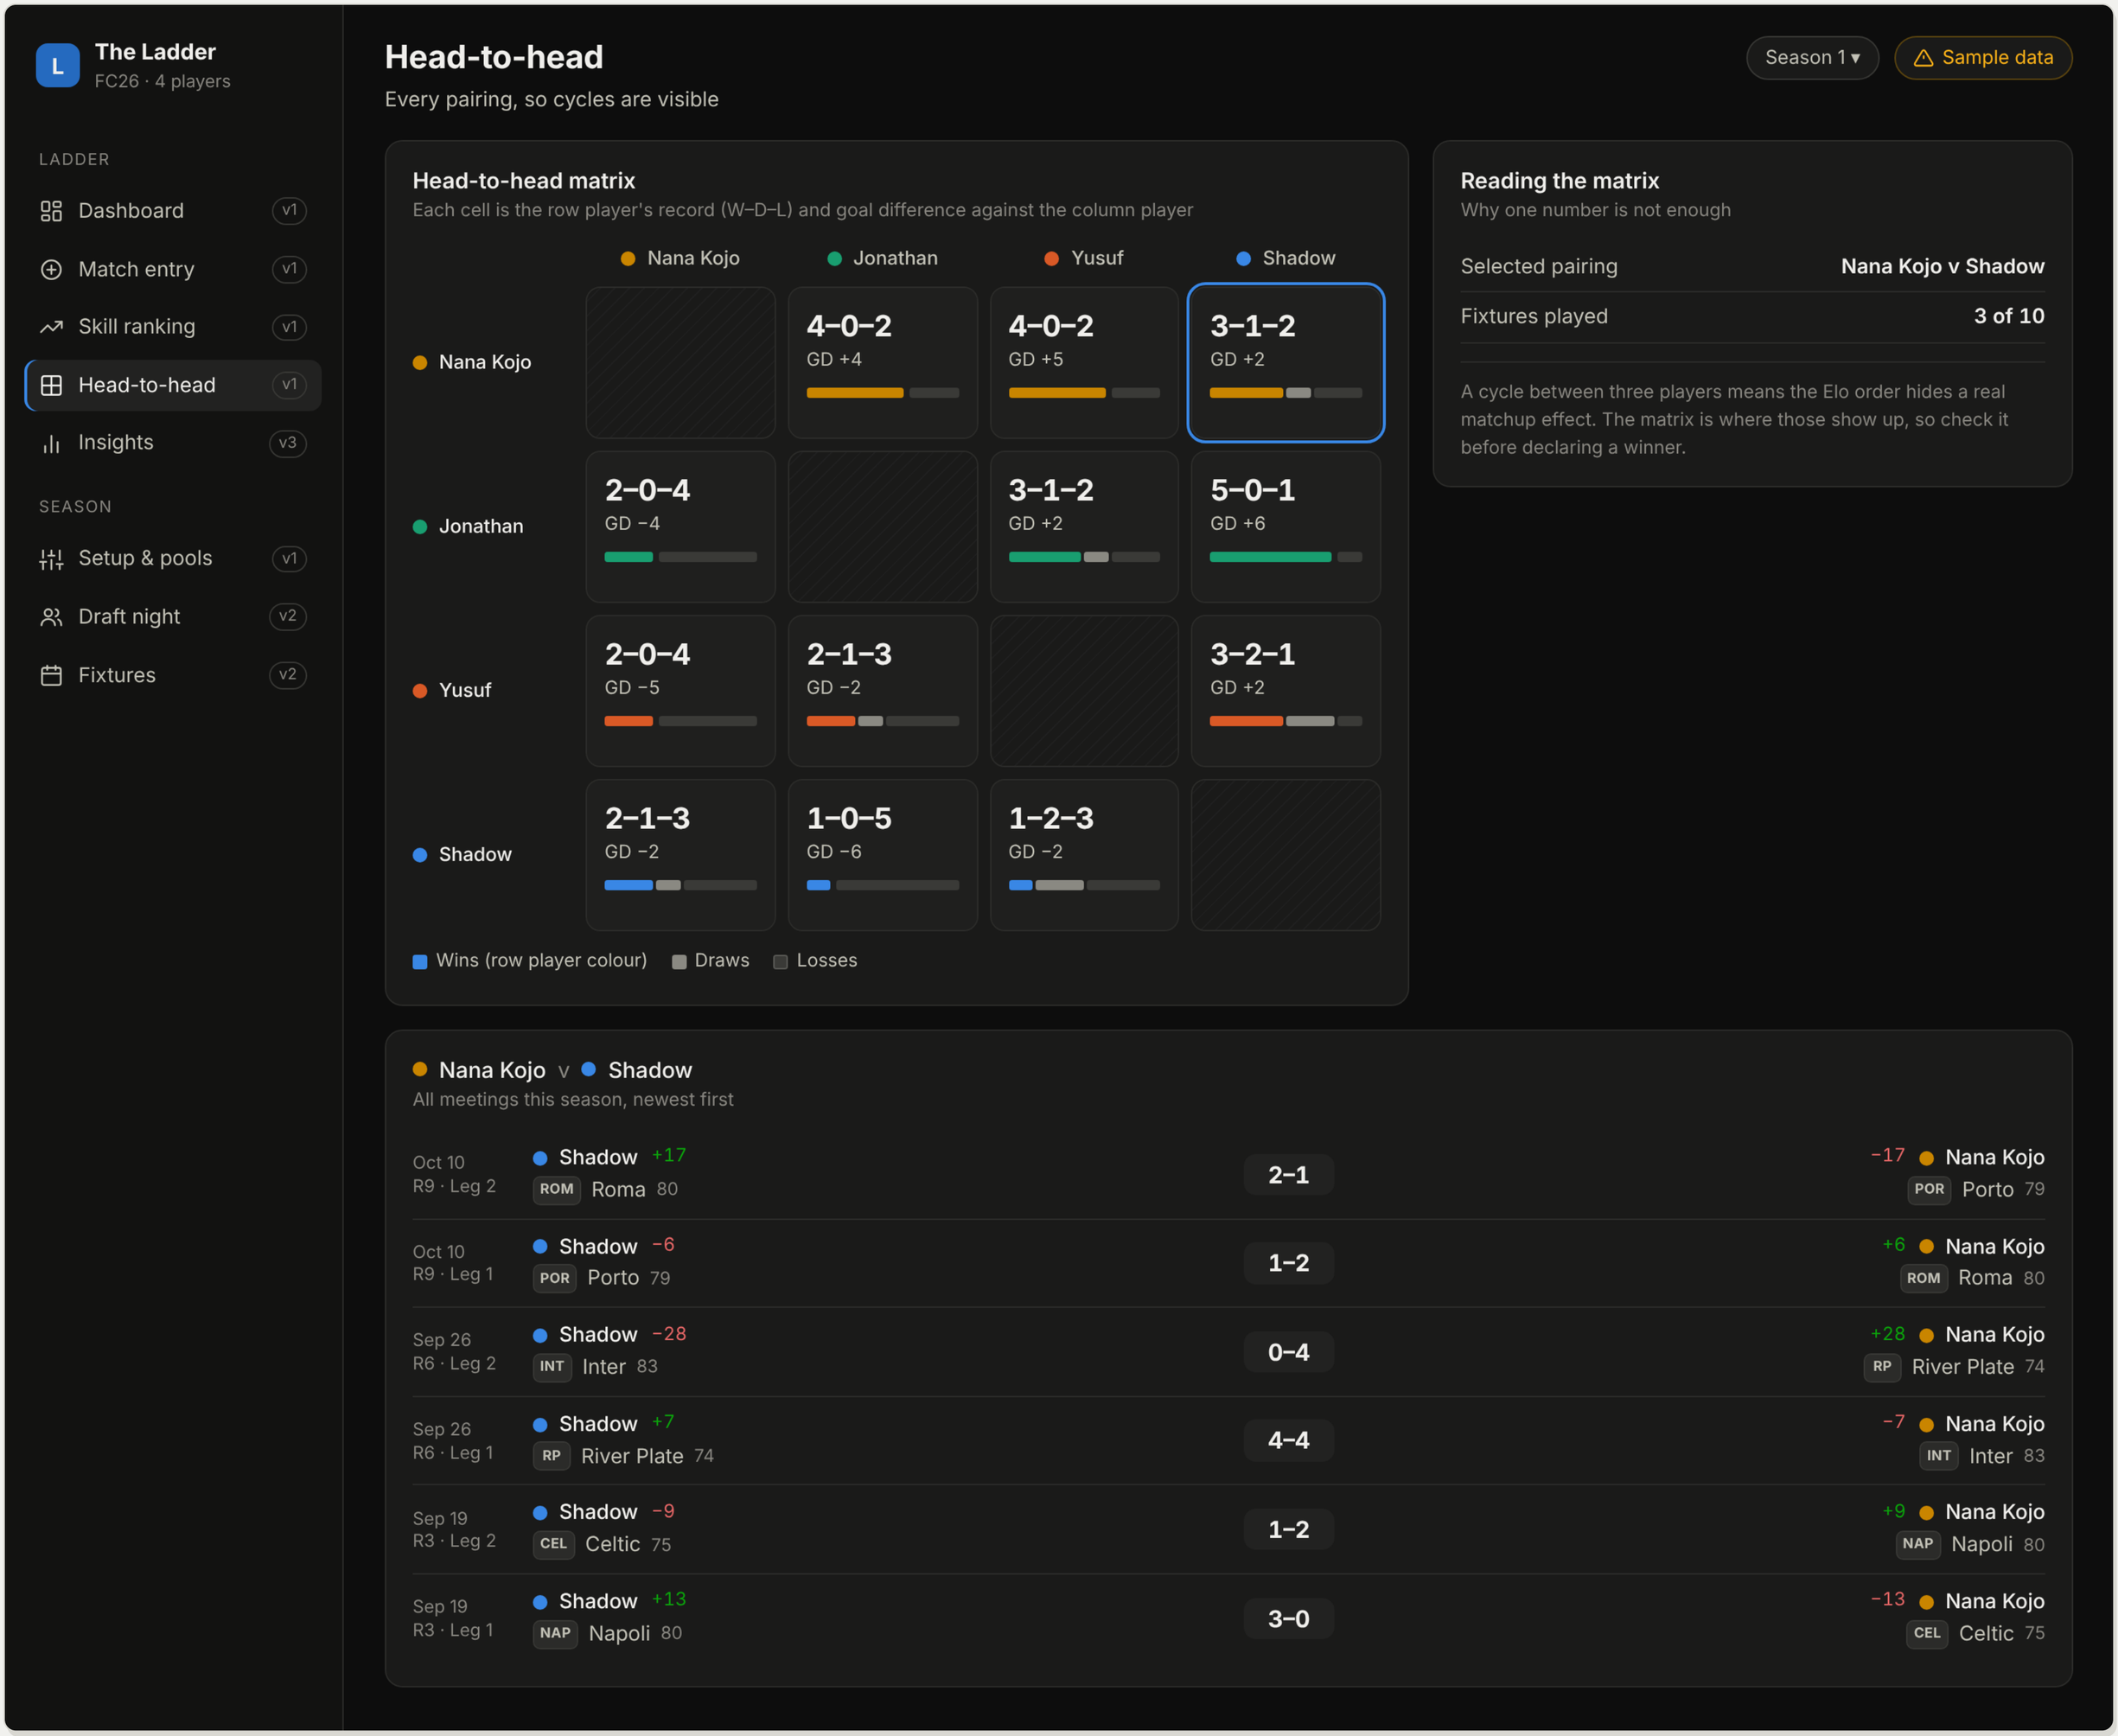

Ratings and uncertainty v3

Dot = current Elo · bar = 90% range · “Top-rated in” = share of resamples where the player finishes first

#	Player	Elo	Last 5	90% range (tick = start 1000)	Top-rated in	Matches
1	Nana Kojo	1061	±0	990–1132	70%	18
2	Jonathan	1020	+9	963–1074	21%	18
3	Yusuf	991	+12	938–1050	9%	18
4	Shadow	929	−21	866–995	1%	18

06 **Head-to-head** v1 MVP

Records for every pairing, so cycles between players are visible.

07 **Insights** v3

Upset rate, clean sheets, streaks and win rate by team tier.

Insights

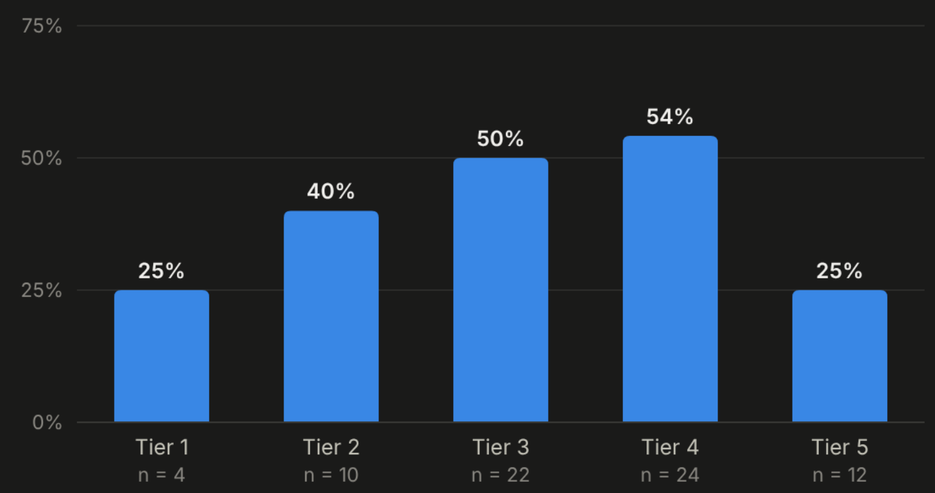

Extra views to spot luck, upsets and handicap problems

Season 1 ▾ | ⚠ Sample data

Upset rate	Biggest win	Longest unbeaten run	Clean sheets
40%	**4–0**	**6**	**15**
12 of 30 decisive games won by the lower-rated team	Nana Kojo · Sep 26	Nana Kojo	Nana Kojo leads with 5

Win rate by team tier used

Share of games won with a team from each tier — a check that the handicap is doing its job

Per-player details

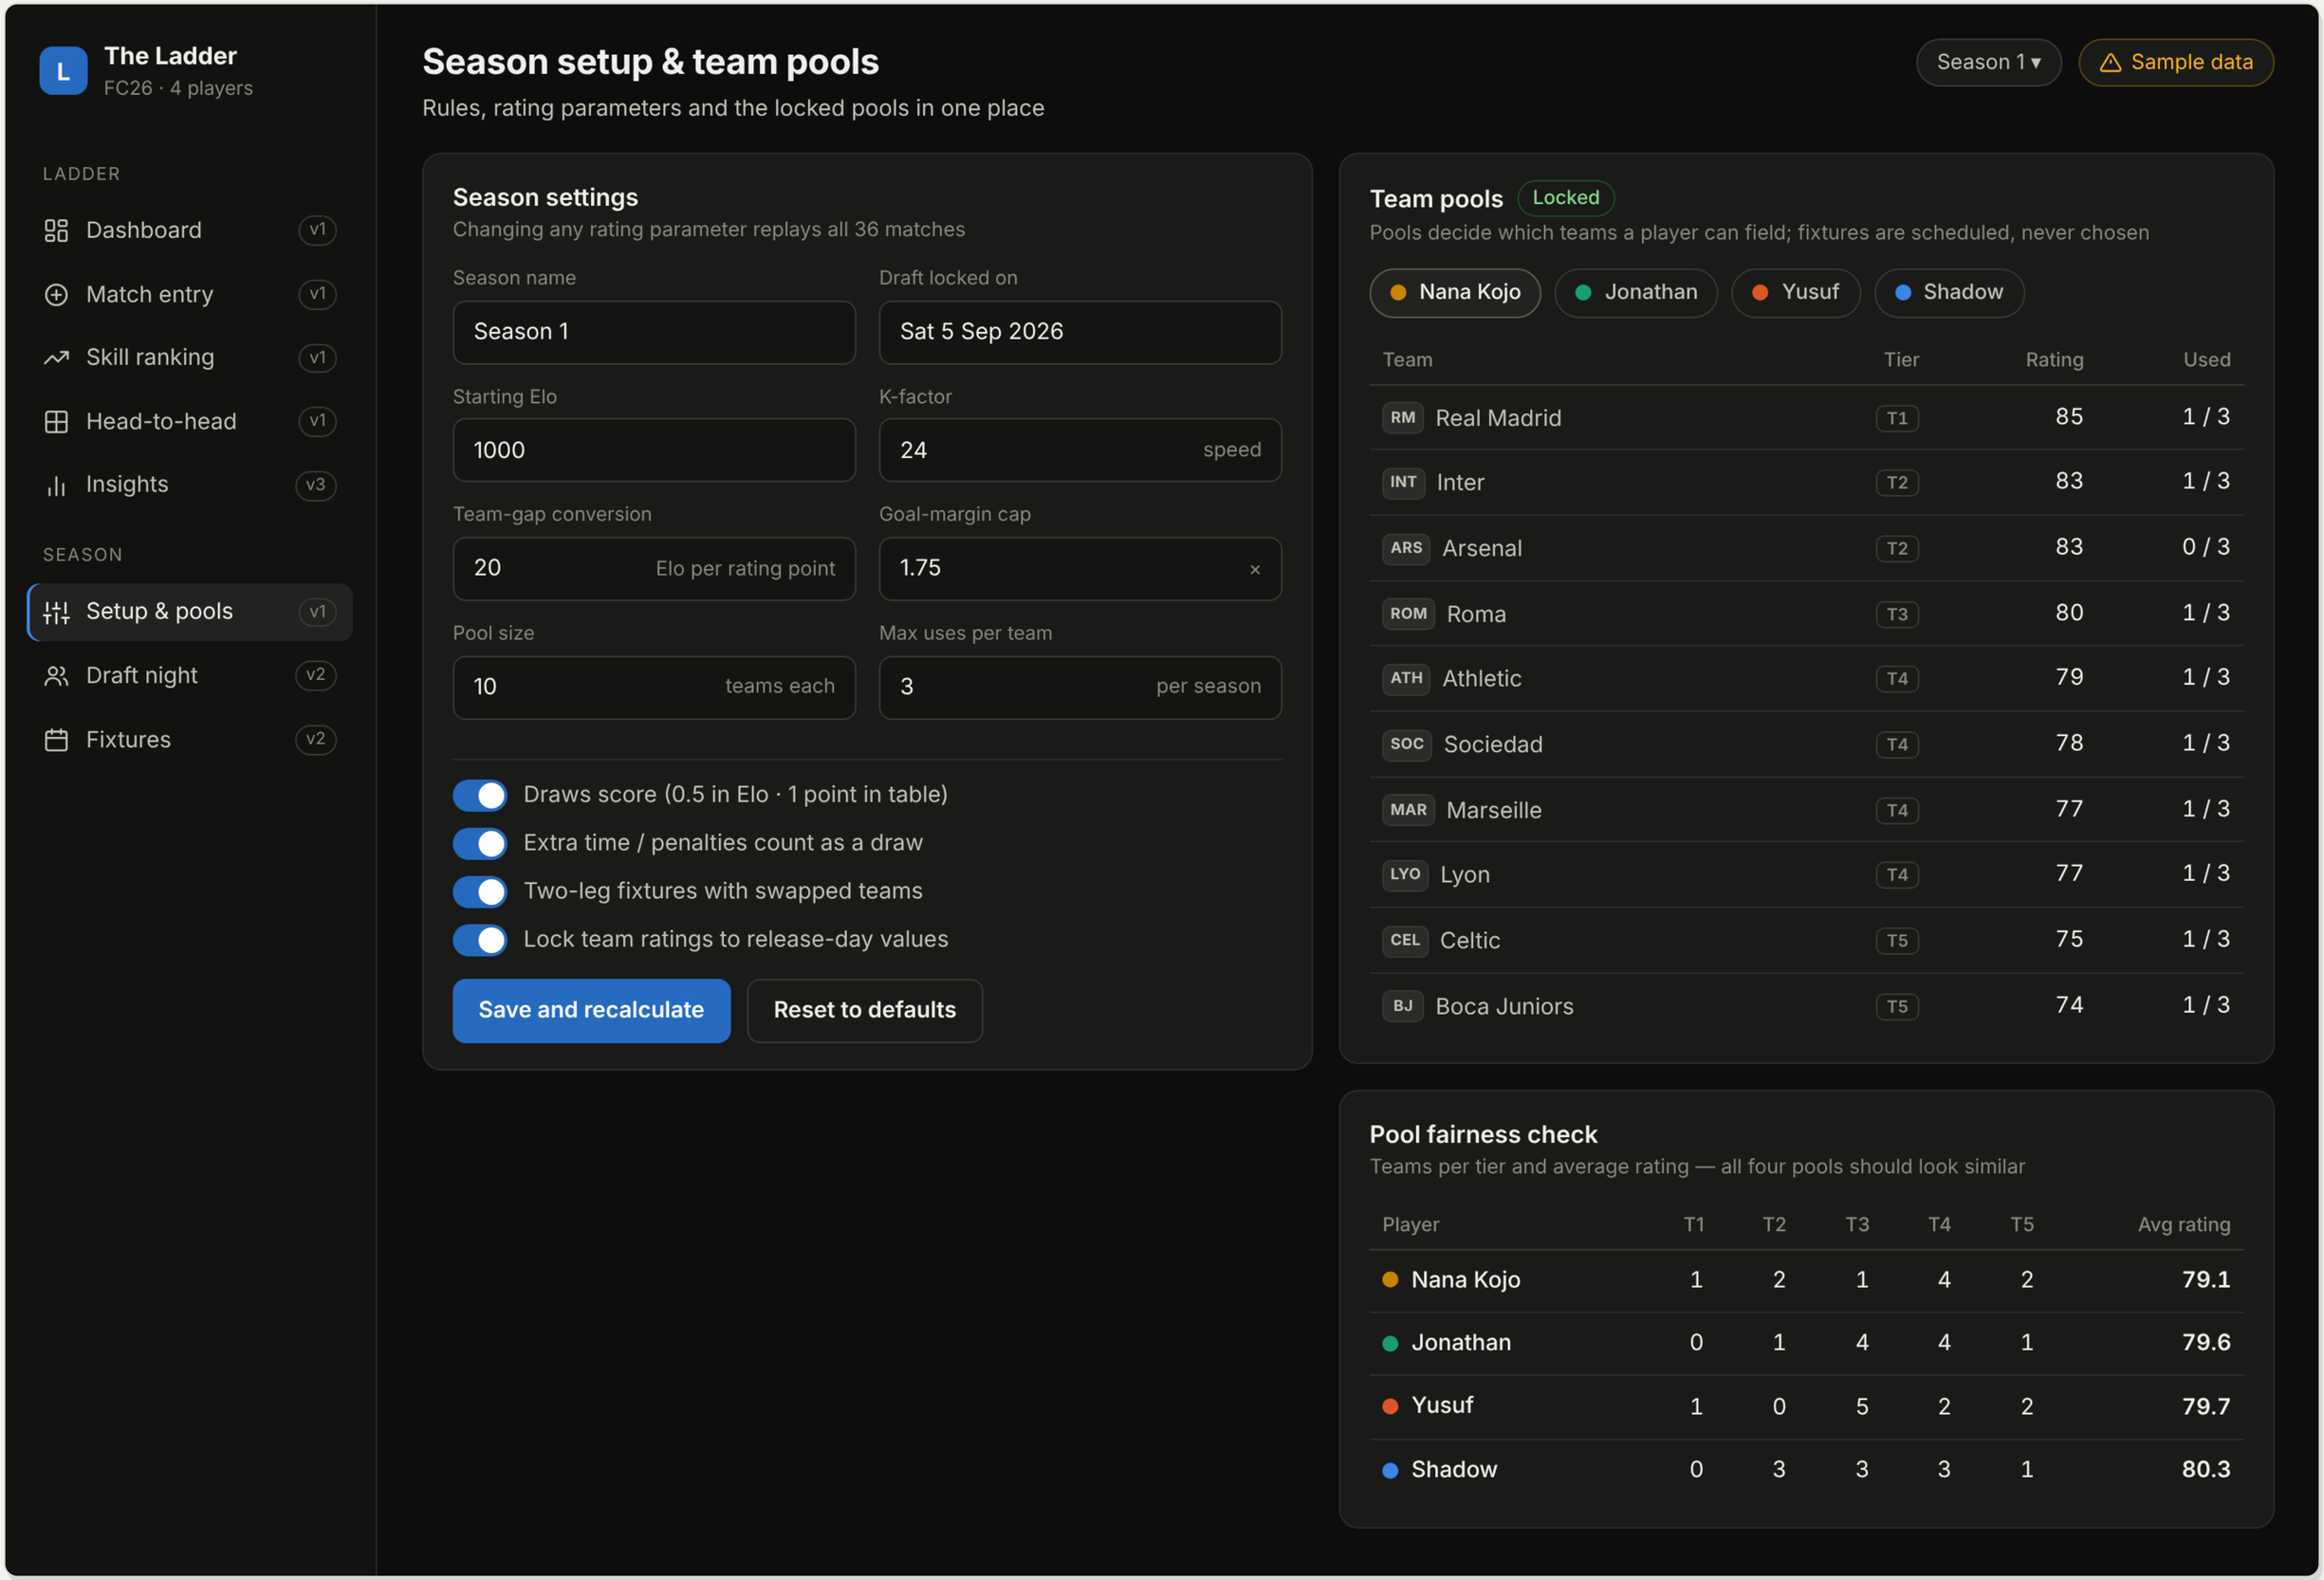

Sorted by Elo

Player	Clean sheets	Unbeaten run	GF / game	GA / game
Nana Kojo	5	6	1.94	1.33
Jonathan	4	3	1.78	1.56
Yusuf	4	4	1.39	1.67
Shadow	2	2	1.17	1.72

Small samples swing wildly: most tiers have few games so far. Treat these as prompts to look closer, not as findings.

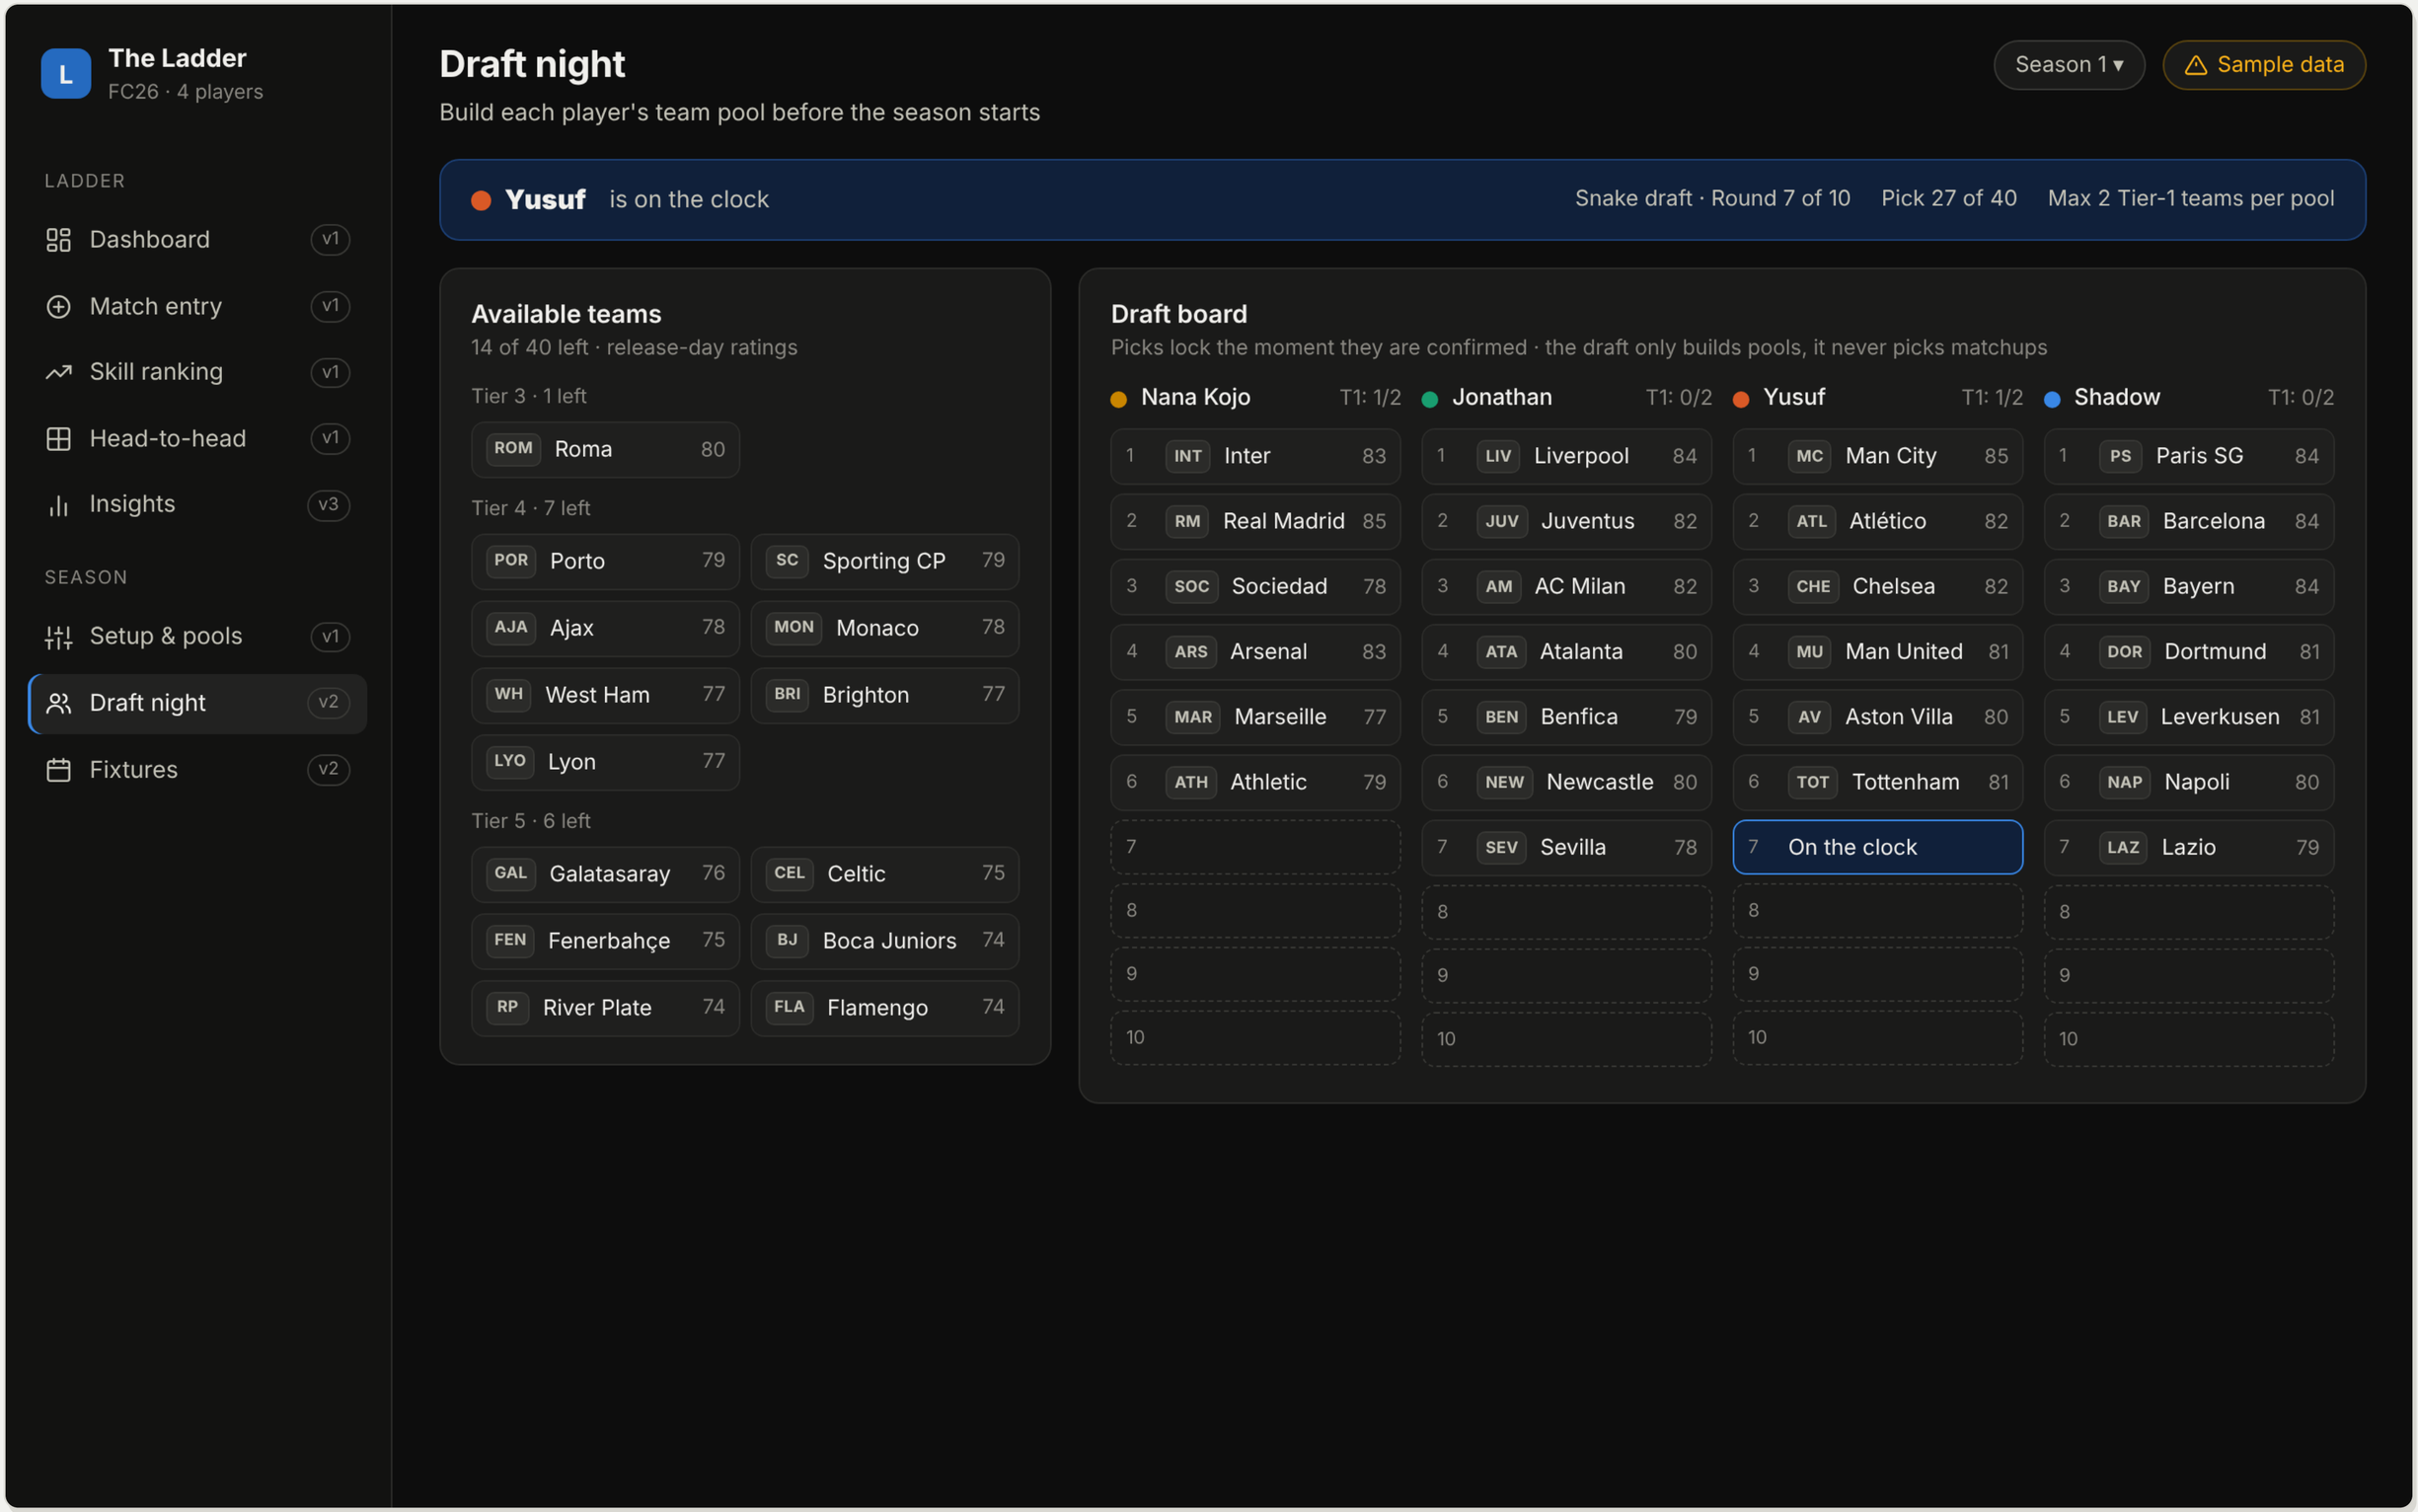

08 **Season setup and team pools** v1 MVP

Rating parameters, rules and the locked pools, with a fairness check across players.

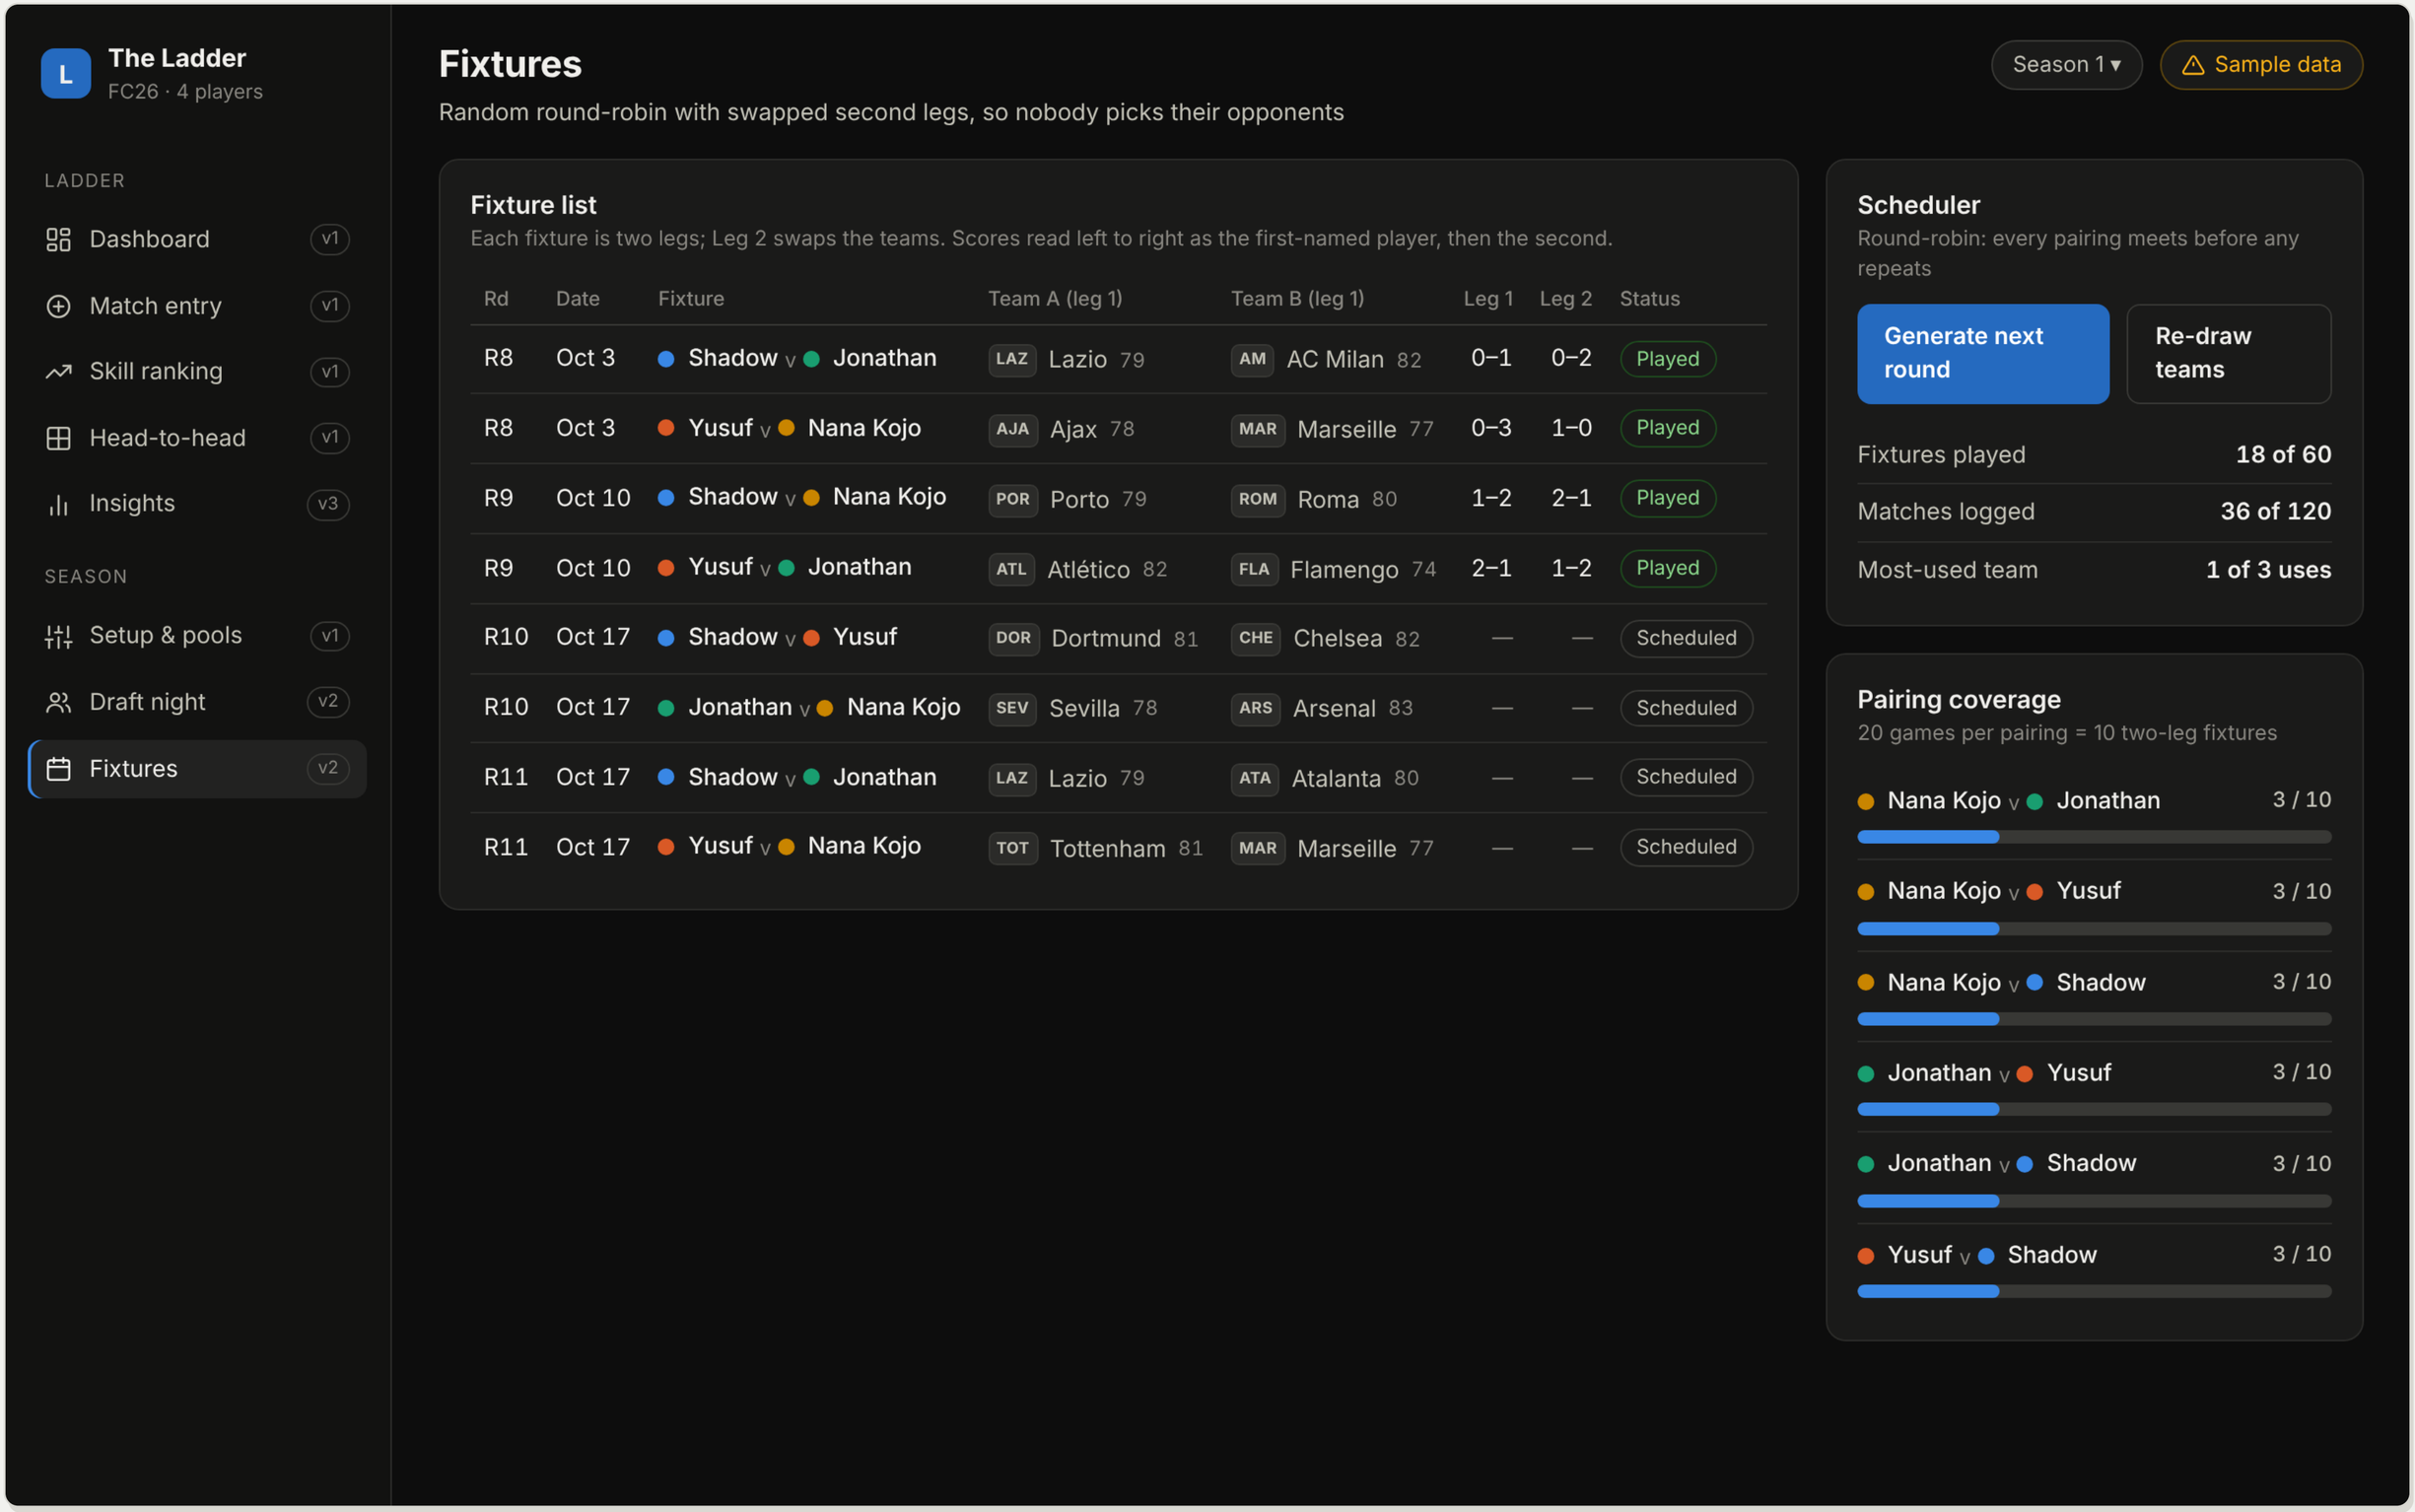

09 **Draft night** v2

Snake draft that builds each player's pool. It never picks matchups.

10 **Fixtures and scheduler** v2

Round-robin with swapped second legs, plus progress towards 20 games per pairing.

11 Phone view v1 MVP

The same ladder on a phone, for logging results from the sofa. Dashboard (left) and match entry (right).
